 - ... **NOT** about navigational queries

WebCLEF 2007

■ It was ...

- ... **NOT** about working with a large web crawl
- ... **NOT** about working with EuroGOV
- ... **NOT** about navigational queries

■ What was it?

- Given a topic X , aggregate valuable factual bits of information from web documents about X
- Undirected informational queries: “Tell me what I need to know about X ”
- The organizers provided the documents (HTML, txt dump, ...)
- Participants created topic and assessed systems’ responses

WebCLEF 2007

WebCLEF 2007

■ Scenario

- User writing a survey/overview on a certain topic, with a specific goal and audience in mind

WebCLEF 2007

■ Scenario

- User writing a survey/overview on a certain topic, with a specific goal and audience in mind

■ Topics

- Consist of topic statement, description, list of acceptable languages, [list of URLs of known sources], [list of Google queries for the topic]

WebCLEF 2007

■ Scenario

- User writing a survey/overview on a certain topic, with a specific goal and audience in mind

■ Topics

- Consist of topic statement, description, list of acceptable languages, [list of URLs of known sources], [list of Google queries for the topic]

■ Data

- Collection per topic, crawled by task organizers using the Google queries associated with the topic

WebCLEF 2007

■ Scenario

- User writing a survey/overview on a certain topic, with a specific goal and audience in mind

■ Topics

- Consist of topic statement, description, list of acceptable languages, [list of URLs of known sources], [list of Google queries for the topic]

■ Data

- Collection per topic, crawled by task organizers using the Google queries associated with the topic

■ System response

- Ranked list of snippets that are worth including in the survey being written
